ABOUT

DIVERS OUR OCEANS THE FUTURE OF THIS PLANET

For over 50 years, Scubapro has been committed to the sport of diving and to the protection of the world's oceans that provide us all with so much of our enjoyment, exploration and adventure.

From our environmentally responsible products, materials and manufacturing techniques to sponsoring the conservation efforts of numerous organisations and our Deep Elite Ambassadors work, no dive company does more to protect the environments we all love to explore.

SCUBAPRO
cares

SUSTAINABLE PRODUCTS

Scubapro dive wear is the greenest – or rather bluest – in the industry. In 2012 Scubapro was the first to introduce X-Foam neoprene in an ongoing effort to reduce pollutants and harmful emissions. In 2016, we were the first to introduce solvent free glue on our Everflex suits. Today, all Scubapro Neoprene drysuits, wetsuits, hoods and gloves feature solvent free glue to better protect divers and the environment.

RESPONSIBLE PACKAGING

- All of our regulators, instruments and dive computers are packaged in 100% plastic free carton boxes. Our next step is to move from boxes to fabric cases, like the one already used in the packaging of the MK25 EVO/S620ti.
- Working diligently over the past few years we have removed 90% of the plastic packaging from our line of accessories in favour of carton header cards, and our goal is to reach 100% in 2019.
- Most of our masks come in a reusable box that can be used for transport and storage, and is also handy for holding small items you need for diving or spare parts.
- Plastic boot bags have been replaced with reusable fabric bags for transport and storage. Similar packaging for dive socks, gloves and hoods will follow in 2019.
- Some of our fins are already available in reusable mesh bags. For 2019 and beyond, new fin packaging will be cardboard boxes made from recycled paper with plans to carry this over into BCD's in the future.
- Starting in 2019 all plastic packaging will be removed from spare parts.

SCUBAPRO products help new and experienced divers to discover and experience the amazing undersea world, and we invite everyone to join us in working to preserve it for future generations.

PROMOTING DIVING WHILE PROTECTING OUR OCEANS

It is the SCUBAPRO way. Our mission, our passion. And SCUBAPRO leads by example.

BUILDING AN OCEAN ETHOS

Scubapro believes in working together to take on the biggest issues facing our oceans, while encouraging every diver to be conservation minded. For over 50 years, we have partnered with organisations that support these ideals, including Mission Blue, Galapagos National Parks, Conservation International, WWF, Antinea Foundation, REEF, and the National Marine Life Centre, amongst many other agencies.

LIVING OUR VALUES

Scubapro is staffed by avid divers who recognise a personal responsibility to preserve and protect the very thing that our products allow divers to explore. Renowned marine biologist and preservationist Dr Sylvia Earle sat on our board for many years, while SCUBAPRO's president is on the Advisory Board of the National Oceanic and Atmospheric Administration (NOAA). Scubapro employees are active volunteers and our regional offices regularly lead beach clean ups and donation drives each year.

Combining the iconic design of the original D-Series regulators with the latest advances in breathing performance technology, SCUBAPRO engineers have created a 21st century regulator in terms of quality, reliability, performance and style. The new D420 features a brand new balanced valve inside a housing supported by a full metal structure. Called the Progressive Flow Control Valve, it is able to deliver abundant airflow for the best breathing performance, with a natural smoothness comparable to what you might experience breathing on the surface. The uniquely shaped fiberglass-reinforced nylon casing is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility. A new dive/pre-dive system includes a switch on the top of the casing with a thumb tab for adjusting the direction of airflow right out of the valve. The highly efficient purge button is a technical jewel based on a new concept that gives the D420 its unique face. Teamed with the venerable MK25 EVO balanced piston first stage, this is a regulator system purpose-designed for today's avid divers and SCUBAPRO brand enthusiasts everywhere.

D420

- NEW. Uniquely shaped fiberglass-reinforced nylon casing carries on the D-Series heritage with the latest advances in breathing performance technology.
- NEW. Air-balanced Progressive Flow Control Valve is able to deliver abundant airflow with a natural smoothness comparable to breathing on the surface.
- NEW. Dive/pre-dive system includes a switch on the top of the case with a thumb tab for adjusting the direction of airflow right out of the valve.
- NEW. Casing design features inner winglets that direct airflow towards the exhaust valve, creating a dramatic improvement in exhalation effort.
- NEW. Diaphragm is located in the lower section of the casing to take advantage of the pressure gradient in the upright position, making breathing even easier.
- Reversible hose attachment allows for either left- or right-side LP hose connections for maximum rigging flexibility.
- Large purge button is easy to reach and press, with or without gloves.
- Exhaust tee is compact and efficiently deflects bubbles from the diver's view while enhancing ease of exhalation.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight [without mouthpiece]: 216g.
- Airflow at 200bar: 1800 l/min - 64 SCFM.

REGULATORS

D MASK COMING 2020

Sleek design matches the new D420 regulator.

MK25 EVO/A700 CARBON

EVO

- First Stage
- DLC black finish
 - Balanced High Performance First Stage
 - Air-Balanced Flow-Through Piston Design
 - Externally Adjustable Intermediate Pressure
 - 5 Port LP Swivel and Dual HP Ports

- Second Stage
- Hand-made carbon fiber front cover on a rugged metal case and valve housing are able to withstand years of aggressive diving
 - Precision handcrafted construction and design masterpiece
 - Compact dimensions for lightweight comfort
 - Exceptional breathing performance at any depth
 - The Work of Breathing [WOB] has been lowered to a value of 0.5 J/l
 - New aligned VIVA system with co-axial 2-piece dive switch
 - Full metal body and metal components assure maximum performance
 - Metal provides the best thermal exchange imaginable in cold water

Part No.	Description	Retail Inc GST

Air 2 5th Generation

- Now in a new 5th generation version, the Air 2 is not only an extraordinary BC inflator, but the work-of-breathing has been dramatically improved, providing the same, smooth breathing performance as a downstream second stage regulator
- Classic Downstream Valve
- Dive/Pre-Dive Switch for adjustable VIVA
- Improved design, control and safety for BC inflating
- Larger deflation button and high-comfort mouthpiece
- CE certified EN250 (A> 10°C warm water test controls) as a second stage regulator
- Can be assembled on any Scubapro BCD

GALILEO HUD IS A “HANDS-FREE COMPUTER”

Introducing the Galileo HUD, the revolutionary mask-mounted, hands-free dive computer with a virtual floating heads-up display, giving you more freedom to experience your dive.

Delivers constant, easily viewable, critical dive information without taking your eyes off the dive

All the important dive information you expect from the Galileo 2 Dive Computer in a convenient heads-up display

Quickly find information and personalize settings for any dive, using the intuitive, single-knob input menu

A flip-up hinge allows you to easily tilt the computer up and out of view

Predictive algorithms and decompression calculations can be customised for all skill levels, from beginner to advanced

The Galileo HUD is an innovative and thoroughly unique air-integrated dive computer. This new-to-the-dive-world, technologically-advanced computer offers a heads-up display mounted on a dual-lens mask. It delivers excellent readability along with hands-free data monitoring, creating a user experience unlike anything previously seen in diving.

HANDS-FREE DATA MONITORING is a boon to photographers or anyone engaged in underwater activities that require both hands, including military and public safety divers.

MICRO OLED DISPLAY uses near-eye optics to create a screen image that appears at a virtual distance of approximately 1m, making it easy to monitor your dive data without losing eye contact with your dive surroundings.

INTUITIVE PUSH-WHEEL allows you to access and control HUD functions with one hand. Simply rotate and press – couldn’t be easier.

CONVENIENT FLIP-UP FEATURE, reminiscent of military night vision goggles, enables you to tilt the HUD display up and out of the way. When it’s time to resume data monitoring, flip the display back into position and you’re ready to track your dive.

COMPATIBLE with a variety of SCUBAPRO masks, including the Spectra, Spectra Mini, D-Mask [special mount - part number 24.157.200], Zoom [special mount - part number 24.157.200], Frameless [HUD - part number 24.343.100], Synergy Twin, Synergy 2 Twin, Ecco Mask, Vibe 2, Futura 1 and Pro Ear.

FEATURES

Lightweight (neutrally buoyant) and easily mountable to a dual-lens mask.

Hinge mechanism allows you to easily flip up the HUD when not in use.

Intuitive menu structure and push-wheel interface make for effortless navigation through the system.

Full-Colour OLED 96x64p display

Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB PMG, or ZH-L16 GF.

PMG algorithm offers Microbubble levels and Profile Dependent Intermediate Stops (PDIS).

Selectable dive modes: SCUBA, Gauge, Apnea and CCR.

Trimix and Nitrox compatible, with advanced CCR functionality.

Up to 8 selectable gases in SCUBA mode, plus oxygen and diluent in CCR mode and 2 changeable set points for CCR diving.

Compatible with the SCUBAPRO Smart transmitter for hoseless tank pressure monitoring.

Provides true remaining bottom time (RBT) based on the workload from breathing.

3D full-tilt digital compass allows you to store 3 pre-programmed headings.

Includes built-in GPS for surface navigation.

Maximum operating depth: 120m.

Rechargeable battery provides up to 20 hours of dive time per charge in Power Save mode.

2GB memory stores 10,000 hours of diving.

Download data via Bluetooth or USB cable.

Compatible with Apple and Android devices, as well as Windows and MAC, using LogTRAK.

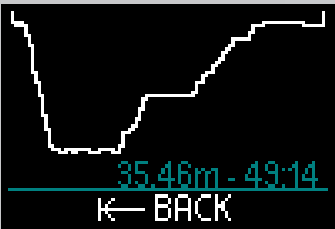

GALILEO HUD INCLUDES: HUD, Mask Mount, Zip Ties, USB charging cable, Transmitter, Read First, Quick Card, Protection foil & lanyard. [Manual is available online].

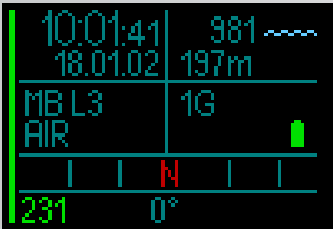

GALILEO HUD COMPATIBLE: Masks that show this icon are compatible with Galileo HUD

INTRODUCTION TO THE HUD

MOUNTING THE HUD

G2 DIVE COMPUTER

- Same intuitive menu structure, same simple 3-button control system, and same diver-friendly functions that make the Galileo so easy to use. Enables a seamless transition from the Galileo to the G2. All accessories are reverse compatible as well.
- Full-Color TFT (Thin-Film Transistor) dot matrix display screen. Produces vibrant colors for maximum readability to quickly bring your attention to what you need to know.
- Customize your data presentation with Light, Classic, Full and Graphical screen options to suit your individual diving style.
- Customize menu listings. Use as much or as little of the G2 technology as you need—it's your choice.
- Multiple Language Choices. Select from more than 19 languages for receiving dive data.
- Predictive Multi-Gas ZHL-16 ADT MB algorithm. Advanced Uwaterc algorithm programs up to 8 nitrox/trimix mixes to handle any recreational or technical diving scenario.
- Integrated heart rate monitor. Measures heartbeat and skin temperature and incorporates both into the workload calculations. Integration with the HRM is exclusive to SCUBAPRO.
- Heart rate monitor also lets you visually track your heart rate "real time" to ensure you stay in your individual target zone to maximize your fun and safety at depth. (Maximum Operating Depth: 197ft/60m)
- Hoseless air integration. Monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation. Provides support for up to 9 transmitters when all features are activated.
- Improved, full tilt digital compass. The best available. Includes bearing memory.
- Rechargeable battery. Provides up to 50 hours of diving per charge. Battery must be changed by the dealer.
- Huge 485MB memory. Stores pictures, tables, tissue loading status, and 1,000 hours of dive profiles.
- USB cable or Bluetooth Low Energy interface. Easily download dive data wirelessly to your phone or handheld device. Download dive data to a PC/Mac using LogTRAK software.
- Curved ergonomic low-profile shape. Sits comfortably on the arm and resists rotating (integrated bungee mounts are provided for tech divers). Can also be used on a retractor.
- Rugged TR 55 transparent thermoplastic lens protects the full color dot matrix TFT display. Features a backlight to enhance low-light readability.
- Sleek, Swiss design. The best elements of the Galileo in an upscale design.
- Stainless steel control buttons (3). Accessible, intuitive, easy to use, even when wearing gloves.
- Multiple dive modes. Scuba, Freediving, Gauge, CCR and Sidemount for total in-water versatility. (Freediving, Trimix, CCR and Sidemount modes are disabled from the factory. Activation is easy – no downloading or upgrading is required.)
- Special apnea logbook. Stores repetitive dives sequentially under the same apnea session.
- Maximum operating depth. 120m/394ft for reliable data computing regardless of diving situation.
- Each G2 comes packaged with a Transmitter, a SCUBAPRO Heart Rate Belt, a Read First manual, a 3M foil screen protector, a soft box, a USB cable and a retractor clip.

A1 DIVE COMPUTER

The new A1 is a basic entry-level dive computer designed for new divers and casual recreational divers looking for a simple yet versatile wristwatch-style computer that can be worn on the surface as well as under water. The A1 offers full time-keeping functions, and three Dive modes plus a Sport mode. An intuitive menu system and clearly marked button controls make it easy to access and understand all functions. Offering just the right balance of topside features, underwater functions and ease of use, the A1 will quickly become an integral part of not just your diving life, but of your everyday life as well.

- Modern design is functional and stylish for topside time-keeping as well as underwater data tracking.
- High-resolution matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist
- Intuitive menu and four button controls make it easy to navigate
- ZH-L16 algorithm allows single-gas Nitrox capability from 21% to 100% O2
- PDIS (Profile Dependent Intermediate Stops)
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning
- Full watch functions for topside time-keeping
- 3 Dive modes: Scuba, Gauge, and Apnea
- In Sport mode sport-related functions like a swim stroke counter and a stopwatch can be activated
- Max Operating Depth: 394ft/120m
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac
- Firmware can be user-updated by going to scubapro.com
- CR2450 battery is rated for up to two years/300 dives
- Included: Protection foil, Quick Card, Arm Strap Extension, Read First (user manual is available online)

Part No.	Description	Retail Inc GST
05.064.101	ALADIN A1 (RUBBER STRAP)	585.00

A2 DIVE COMPUTER

The new A2 is designed for advanced divers and technical divers who appreciate a wristwatch-style dive computer, but demand the kind of features and functions that enable them to excel in their sport. For daily topside use the A2 offers full timekeeping functions and a Sport mode. When it's time to go diving, the A2 offers everything an advanced recreational diver wants, and everything a technical diver needs. It starts with wireless air integration that monitors tank pressure and provides true remaining bottom time. The digital tilt-compensated compass provides easy navigation under water or on the surface. Whatever type of diving you do, the A2 is ready to go there with you.

- Smart technology wireless air-integration can handle multiple transmitters.
- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Heart rate monitor records heartbeat and skin temperature (with SCUBAPRO HRM Belt only) that can be factored into the decompression calculation.
- Digital tilt-compensated 3D compass allows for easy navigation.
- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates eight gases (21-100% O2) plus two in CCR mode.
- PDIS
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Multiple Dive modes: Scuba, Gauge, Apnea, Trimix, Sidemount, CCR.
- Sport mode offers sport-related functions like a swim stroke counter, activity counter (pedometer) and stopwatch.
- High-resolution matrix display with large numbers is easy to read
- Intuitive menu and four button controls make it easy to navigate.
- Max Operating Depth: 394ft/120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.com.
- CR2450 battery is rated for up to two years/300 dives.
- Included: Protection foil, Quick Card, Arm Strap Extension, Read First (user manual is available online). Optional equipment: transmitter, heart rate belt.

ALADIN SPORT MX COMBINATIONS

- Predictive Multi-Gas ZHL16 ADT MB algorithm accommodates three gases (21-100% O2).
- Micro bubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- PDIS (Profile Dependent Intermediate Stops) calculates intermediate stops based on N2 loading, current and previous dives, and breathing mixes for safer diving.
- Computer screen features an easy-to-read segmented display on the top and middle rows, plus an eye-pleasing matrix display on the bottom row.
- Digital compass, displayed on the matrix bottom row, allows for on-the-spot navigation, at depth and on the surface.
- Active back light, full watch functions, a bookmark function, a dive planner and a logbook are just a sampling of the available features.
- Two black plastic buttons provide easy access to modes and the programming of basic parameters.
- CR2450 user-replaceable battery is rated for two/three years or 200 dives
- Battery compartment is independent from electronics
- Three operating modes – Scuba, Free dive and Gauge.
- Android and iOS app compatible, all using the new Blue tooth 4.0 interface

HYDROS X

The Hydros X is the world’s first front-adjustable BCD to offer a fully injection molded Monprene® thermoplastic harness. This unique feature allows you to tailor the harness shape to perfectly fit your torso, creating superior comfort. Add the full-sized backpack and stainless steel Super Cinch tank band and you also get excellent stability both on the surface and at depth. The air cell and harness are modular and detachable. The bladder, made out of EndurTex high-tenacity nylon fabric, is extremely lightweight and durable while offering generous lift capacity, aided by lower back bellows. In the event of damage, every component on the Hydros X is detachable and easily replaceable. Its flat-buckled quick-release integrated weight system and rear trim weight pockets work together to offer a more comfortable and balanced ride when cruising the depths. The two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded. Two stainless steel D-rings provide clip-on points for additional gear. In addition, the Hydros X features a Multi-Mount Accessory Matrix with multiple D-Ring and mounting points that easily attach various dive accessories.

- Hydros X is based on the same modular Monprene® harness and backpack design popularized by the Hydros Pro back-inflation BCD.
- NEW. EndurTex high-tenacity 420 nylon fabric bladder is lightweight yet extremely durable.
- Monprene® thermoplastic harness is extremely resistant to UV, chemicals and abrasion, plus it doesn’t absorb water to minimize drying time.
- Rotating quick-release shoulder buckles allow you to route your shoulder straps to optimize fit.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Integrated front weight system is based on the same rubber pockets found on the Hydros Pro.
- Two rear trim pouches help create a comfortable swimming position.
- Two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded.
- Two stainless steel D-rings provide clip-on points for additional gear.
- Includes Multi-Mount Accessory Matrix with multiple D-rings and mounting points that easily attach various dive accessories.

HYDROS PRO

A technological breakthrough in BC Design and Manufacture, the ground breaking HYDROS PRO uses an all-new construction method that features an exclusive Fluid-Form 3D Monoprene® Gel Harness System. Fluid-Form replaces the traditional Cut, Make & Trim [CMT] method of manufacturing BC's by replacing stitched fabric with soft, resilient Thermoplastic Elastomer harness components and then assembling them in a modular, mechanical process.

- Injected moulded 3D Monoprene® Gel outer harness: Instant Dry.
- Ultra-durable & increased abrasion resistance.
- Customisable & easily repairable at Dealer level.
- Ergonomic design & lightweight.
- Neutrally buoyant with increased stability.
- Military-grade webbing sub-harness with direct mount D-Rings.
- Fully Weight Integrated to Trav-Tek System, or vice versa.

LEVEL

COMING 2020

The new Level front-adjustable BCD, with its Super-Cinch tank band, brings together all the best performance and comfort features you'll need for any recreational diving scenario. It is lightweight yet extremely rugged – the bladder is made of EndurTex high-tenacity 420 nylon fabric – but what the Level BCD really delivers is comfort. Convenient swivel shoulder buckle straps, a sternum strap and adjustable cummerbund with double-pull over-strap enable you to dial in the perfect fit. The bladder is designed to comfortably wrap around your body without squeeze, and the full-sized backpack, working together with the Super-Cinch tank band, holds the tank rock solid for maximum stability. The integrated weight system loads easy and ditches even easier with its low-profile 40mm flat buckles. Also included are two large cargo pockets, one of which offers metal grommets for attaching a knife, four D-rings for clipping on additional gear, and two Octo pockets for storing both a safe second and a console hose.

- EndurTex high-tension 420 nylon bladder is light yet extremely durable.
- Wraparound bladder comfortably hugs your body without squeeze.
- Convenient swiveling shoulder buckle straps, sternum strap and cummerbund provide plenty of adjustment to achieve that perfect fit.
- Super Cinch tank band is easy to use and ensures maximum stability .Quick-release integrated weight pouches each hold up to 5kg of ballast and feature high-security 40mm flat buckles.
- Two large pockets with Velcro closures provide lots of cargo-carrying capacity, plus one is fitted with metal grommets for attaching a knife.
- Four stainless steel D-rings, three pre-bent, provide lots of clip-on points for additional gear.
- A pair of Octo pockets are perfect for storing a safe second and console hose.

TRIM WEIGHT POCKETS

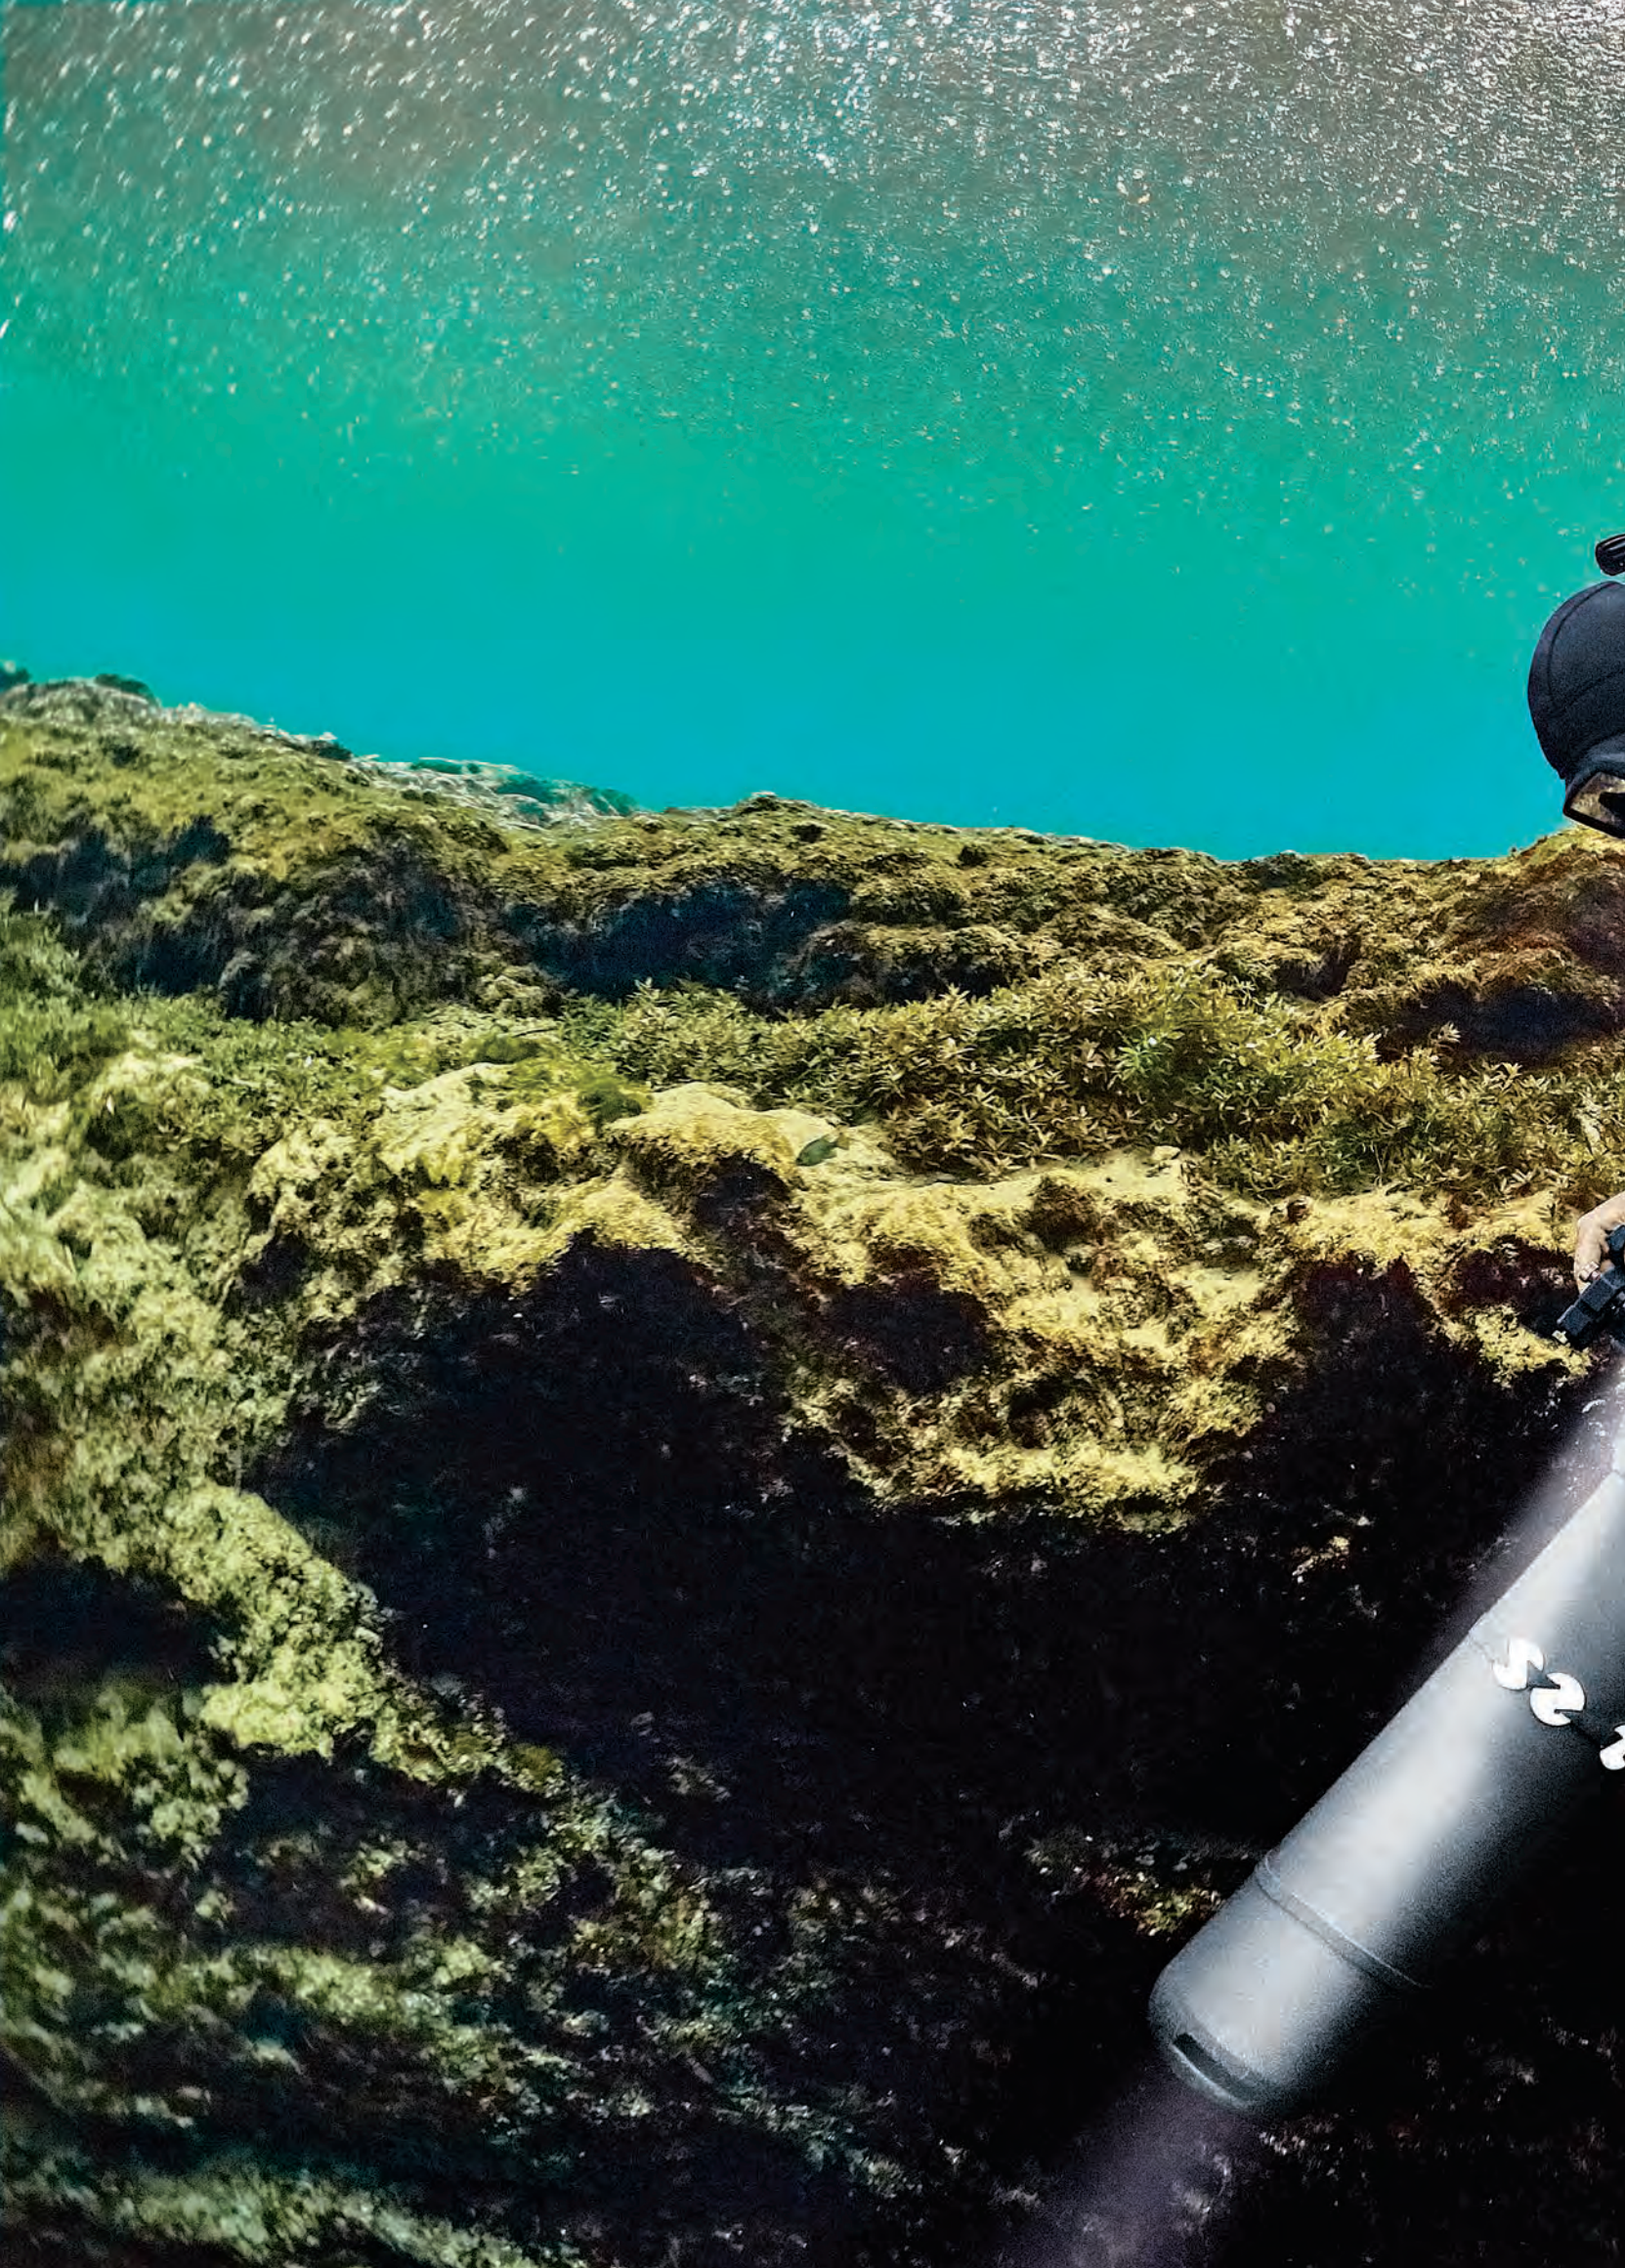

COMING 2020

Now any SCUBAPRO BCD, including entry-level BCDs and those with full-sized backpacks, can be retrofitted with a high-quality trim weight system to aid in improving a diver's swimming position.

- Low-profile buckles keep weights secure while diving.
- Each pocket can carry up to 2.2lb/1kg of weight.
- Mounting trim weight pockets on a BCD is extremely easy; however, the kit should be installed by an authorised SCUBAPRO Dealer/Tech Service only, to prevent any potential issues.

X-TEK SIDEMOUNT

Side-mount diving was originally conceived as a specific cave diving layout, allowing better maneuverability in small spaces. Side-mount diving has now become widespread. SCUBAPRO’s modular design and compact independent air cell, developed in coordination with leading side-mount cave divers, is available in two sizes. It provides guaranteed quality and a configuration for every diver’s needs.

- Compact independent air cell
- Two air cell sizes: 12 / 20 liters lift (25/45lb)
- Soft Air net finished backpack
- Compatible with current X-TEK Steel and aluminum back plates
- Stainless steel grommets, D-rings and handles
- New Dump valve, corrugated hose and BPI
- Specific streamlined elbow
- Bungee and hooks for tank support
- Fully adjustable, easy to wear and configure
- Harness includes crotch strap
- Side bungees for streamlined shape

- System includes:
- Sidemount Harness
 - Your choice of 12 or 20L Wing
 - Sidemount Cover

In Europe Neoprene wet, semidry and drysuits belong to what is called a PPE category which stands for Personal Protective Equipment and refers to protective clothing, helmets, goggles or other garment or equipment designed to protect the wearer’s body from injury.

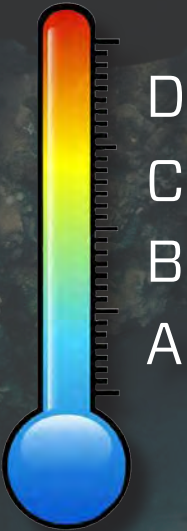

There are 4 PPE by type : Skin protection, Eye protection, Hearing protection and Protective clothing and ensembles including Diving Equipment.

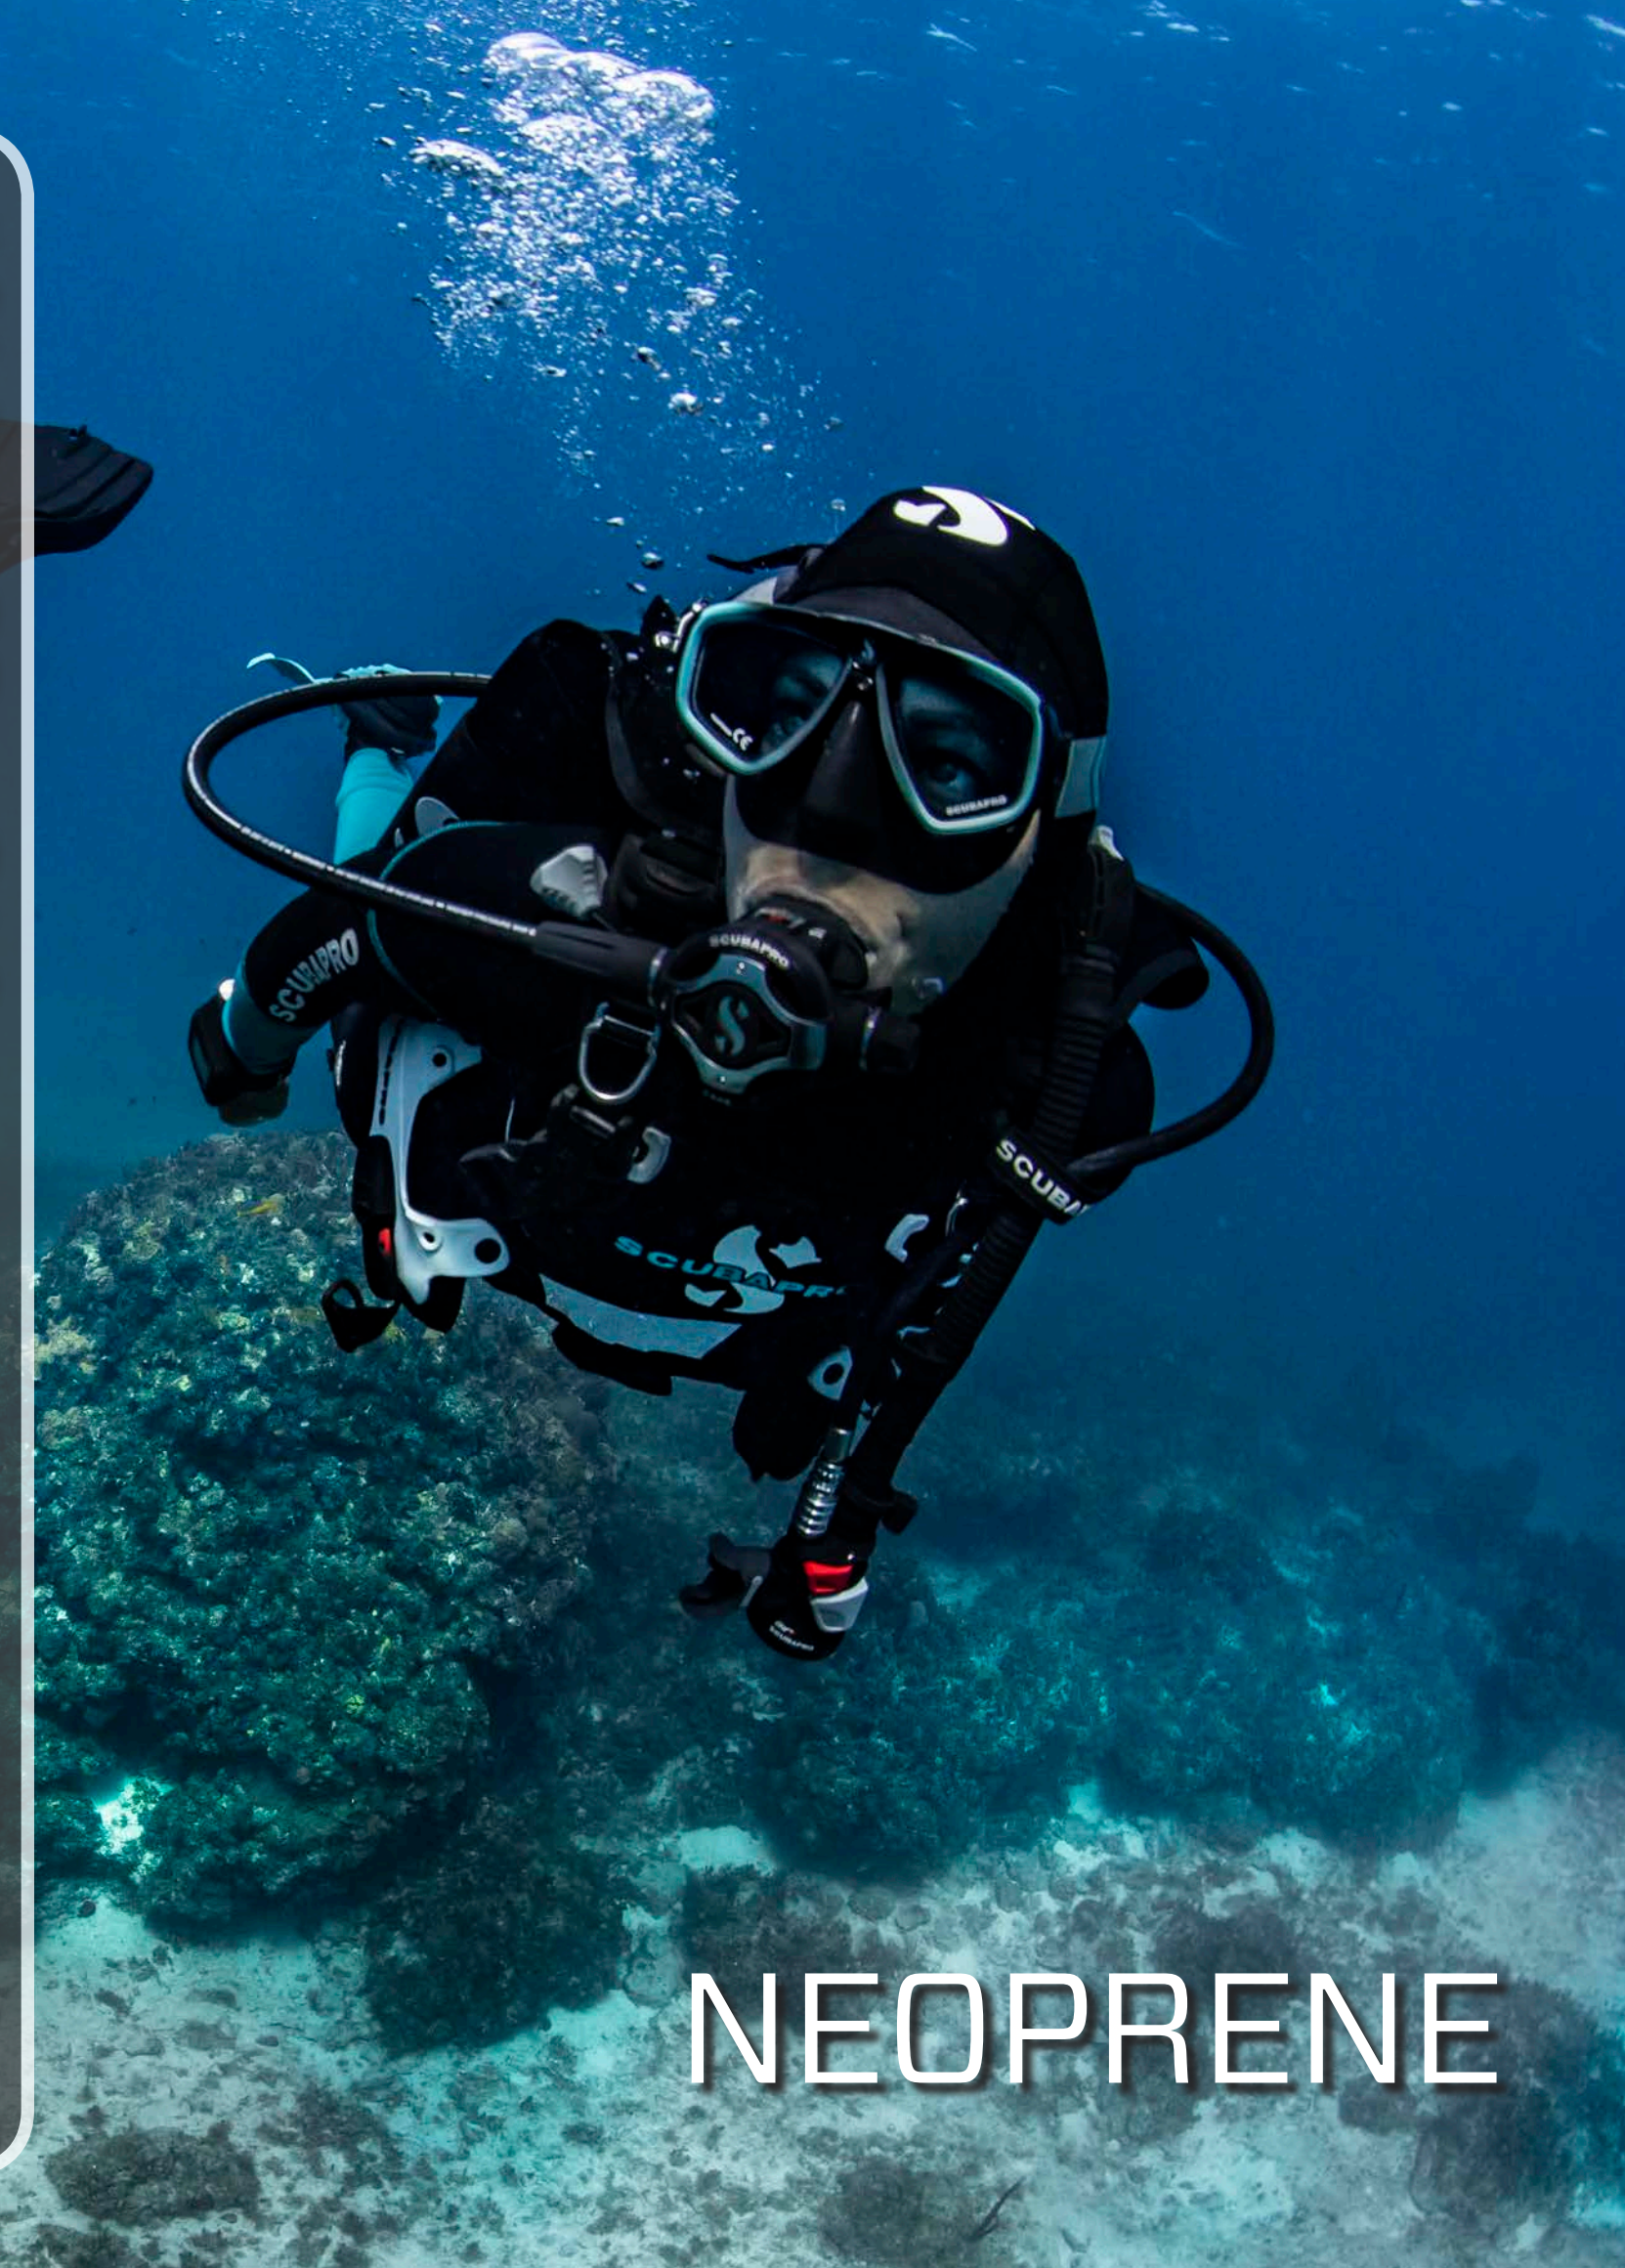

As a consequence all our wet and semidry suits must be fully tested under CE EN 14225-1 standards (drysuits relate to CE EN 14225-2), checking all mechanical resistance and thermal protection ratification classes.

Thermal Performance Classifications have four catergories.

- Class A - [water temperature between 7 and 12 degrees]
- Class B - [water temperature between 10 and 18 degrees]
- Class C - [water temperature between 16 and 24 degrees]
- Class D - [water temperature between 22 degree & above]

Category	Thermal Class
Nova Scotia 7.5	A
Everflex 7/5	A
Everflex 5/4	B
Sport 5.0mm	B
Sport 3.0mm	C
Oneflex 7mm	B
Oneflex 5mm	B

NEOPRENE

CAPE HORN DRYSUIT

When it comes to fabrics, there’s nothing stronger than Cordura. It’s no surprise that SCUBAPRO’s premium-plus fabric drysuit – the Cap Horn Dry – includes a 100% Cordura exterior layer as part of its trilaminate design. Targeted to the tech diving community, the Cap Horn Dry accompanies its durable fabric blend with a stitch and double waterproof tape seam assembly, a convenient Si-Tech ring seal system for wrists and neck, quality Si-Tech valves and a pair of attached semi-rigid dive boots. Tech divers tend toward self-sufficiency, so the front diagonal zipper is ideal for self-donning and self-zipping. Designed to take anything a tech diver can throw at it, the Cap Horn Dry will keep you warm, dry and protected for years of active diving.

- Cordura/butyl/nylon trilaminate design is unbeatable when it comes to durability.
- Seams are stitched then double-waterproofed-taped for maximum reliability.
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy.
- Si-Tech ring seal system for latex wrists allows for the quick replacement of damaged seals or the use of optional silicone seals
- Warm neck collar keeps heat in and helps protect the latex neck seal.
- Quality Si-Tech valves ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots include Velcro straps to improve fit while preventing air from traveling to feet. Boots also include fin strap retainers.
- Two large cargo pockets are equipped with D-rings, bungee, high-security over-flaps and Velcro closures.
- A hook is provided on the right-thigh utility pocket for attaching a hood.
- I-Safe straps on both arms offer a secure mounting spot for wrist instruments.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- Hood features an air vent system and a hook for securing to the cargo pocket.
- Includes an anatomically shaped hood, carry bag, low pressure hose, repair kit and owner’s manual.

EVERTECH BREATHABLE DRYSUIT

The Evertech Dry Breathable is a premium trilaminate drysuit designed for advanced divers and loaded with features. Built with a breathable fabric nylon/PU/nylon trilaminate blend that allows body moisture to exit without allowing water in, plus stitched and waterproof taped seams, a diagonal front waterproof zipper, a Si-Tech super-soft ring seal system for wrists and neck and Si-Tech valves, this fabric suit is top quality throughout. A pair of large cargo pockets, lightweight attached boots and blue suspenders are just a few of the standard features included with a suit designed to keep you warm, dry and comfortable in all water conditions.

- Breathable nylon/PU/nylon trilaminate design Front diagonal BDM metal dry zipper keeps makes self-donning easy.
- Si-Tech ring seal system for wrists and neck allows for the quick replacement of damaged latex seals.
- Warm neck collar keeps heat in and protects seal.
- Quality Si-Tech valves.
- Attached semi-rigid boots
- Two cargo pockets.
- A hook is provided on the right-thigh utility pocket for attaching a hood.
- I-Safe straps on both arms offer a secure mounting spot for a wrist computer.
- Blue suspenders are easy to find inside the drysuit when putting it on.
- Hood features an air vent system, smooth-skin collar, Diamond Span interior and a hook for securing to the cargo pocket.
- Includes an anatomically shaped hood, carry bag, low pressure hose, repair kit, and owner's manual.

EVERDRY 4.0

- 4mm high-density neoprene maintains optimal thermal insulation but weighs 50% less and is softer than any traditional dry suit material: ideal for traveling
- Si-Tech® balanced side-activated inlet and adjustable outlet valves
- Reversed construction rolling neoprene neck seals: watertight protection and easy to get in and out of
- Easy-to-repair neoprene wrist seals for no-leak insulation and comfort.
- Dry back zipper with exterior neoprene protection flap
- Elastic, adjustable & removable suspenders
- 5mm/6.5mm anatomically shaped hood keeps you dry & comfy: prolonged neck; soft face & neck seals; air release system.
- Streamlined heavy duty boots with soft neoprene lining, anti-slip feature and fin strap retainers. Lightweight construction

NOVA SCOTIA 7.5

This new design incorporates 7.5mm neoprene in the chest, torso and upper thigh regions to maximize thermal protection, and 6.5mm neoprene in the arms and lower legs to enhance comfort and range of motion. A new plush interior liner is featured in the arms, legs and shoulder areas to increase warmth and stretch, and the new YKK Aquaseal Vislon waterproof rear zipper is super flexible while totally blocking water entry.

Otherwise, all the great features that have made the novaScotia the premier semi-dry dive suit remain. Glued and blind-stitched seams block water entry, and internal stress discs installed at stitch intersections protect seams and extend the suit's working life. A fold-under neck seal and double zippered wrist and ankle seals work together to keep water seepage to a minimum. Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints to provide protection while adding a stylish look. A protective spine pad offers extra protection where the tank meets the diver's back. There's also an I-Safe strap on each arm for securing wrist instruments and a handy 3D cargo pocket located on the right thigh for carrying accessories.

- CE certified a Class A dive suit -- rated for water temperatures ranging from 7°C to 12°C.
- New 7.5/6.5mm version is made of 100 percent Everflex neoprene, an X-Foam formulation using eco-friendly solvent-free Aqua glue
- 7.5mm neoprene is used in the chest, torso and upper thigh regions for maximum thermal protection; 6.5mm neoprene is used in the arms and lower legs for increased range of motion
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Blind-stitched seams block water entry
- Internal stress discs installed at stitch intersections protect seams, extending the suit's working life
- Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry
- New plush interior liner in the arms, legs and shoulder areas increases warmth and stretch
- Double zippered seals on ankles and wrists feature KA brass sliders for durability, water-tightness and ease of use
- Fold-under neck seal is ultra-comfortable and keeps water seepage to a minimum
- Right thigh 3D pocket with hood attachment hook offers lots of room for carrying extra gear
- Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints to provide protection while adding a stylish look
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back
- I-Safe straps on both arms offer non-slip mounting for wrist instruments

SPORT 5.0MM GEN 2

The Sport 5mm offers must-have thermal protection for first-time suit buyers or occasional divers. It's easy wear, fits like a second skin and looks great in the process. Made from super-soft neoprene, the suit is assembled using solvent-free Aqua glue – a 100% green process. A triathlon cut increases the range of motion in the shoulder and arm areas for maximum freedom of movement on the boat and in the water. The Sport 5mm comes with exterior styling and colours, a vertical-cut rear zipper and a hood hook on the right hip.

- Softer, more flexible neoprene to maximise range of motion
- Suit is assembled using solvent-free Aqua glue, a 100% green process.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas which allows unrestricted arm and shoulder movement.
- Main vertical-cut YKK rear zipper
- Single zippered cuffs on ankles and wrists with YKK KA brass sliders
- The interior is lined with two plush materials for comfort and warmth
- Glued and blind-stitched seams keep warmth in and water out.
- Abrasion-resistant fabric on shoulders, seat and knees
- High-stretch neoprene is great for hard-to-fit divers
- Made from X-Foam neoprene, the only “green” neoprene

SPORT 3.0MM GEN 2

This ultra-comfortable 3mm suit is designed for new divers, casual divers, and first-time suit buyers who enjoy warm water diving in moderate to shallow depths, the Sport 3mm is made from extremely soft and flexible neoprene and features a triathlon cut. This allows for more range of motion in the shoulder and arm areas, delivering maximum freedom of movement on the boat and in the water. The suit features flat-lock stitching, a vertical rear zipper and comfortable plush inside wrists. It is easy to put on and take off, fits like a second skin and looks great.

- Suit is assembled using a solvent-free glue, a 100% green process
- Designed to keep new divers and casual divers warm and comfortable while diving in moderate to shallow depths
- Softer and more flexible neoprene makes Sport suits extremely easy to don and doff maximises range of motion, and radically improves comfort
- Pure Design Concept uses fewer seams and panels for maximum flexibility
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement
- Flat-lock construction is comfortable against bare skin
- Vertical-cut YKK rear zipper with brass slider offers increased long-term durability and ease of use
- Single-cuff ankles and wrists feature a plush interior
- The torso is lined with plush material that enhances comfort and warmth
- Includes abrasion-resistant fabric on shoulders and seat

HYBRID POCKET SHORTS

Comfortable and stretchy, the Hybrid Cargo Short form-fits to your body like you were born wearing a pair. This versatile water sports short is made of a combination of 1 mm X-Foam neoprene and durable nylon. Designed to be worn either by itself or over a dive suit, it comes with a nylon drawstring and reinforced seat. It also includes two large cargo pockets for carrying money, sunglasses or other accessories.

G-FLEX 5MM GLOVES

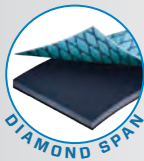

- This 5mm cold water glove features a contoured shape, an easydon zipper entry and a double seal to optimize its water-blocking capabilities. Made from extremely soft and flexible neoprene, this G-Flex material offers lots of stretch for maximum comfort. The textured palm provides a non-slip grip while maintaining maximum finger dexterity. The plush interior promotes warmth and dries fast. The wrist is cut long so it can be easily worn under or over a wetsuit sleeve.

FEATURING THE GO SPORT FIN

A new Boot-Fit version of the award-winning GO Fin. Sharing the main design and features of the existing GO, the SPORT has been adapted with a Boot-Fit design for colder waters and rocky shore entries.

VERSATILE FIT

Available in versatile crossover sizes, fitting a wide range of foot sizes, complete with self-adjusting bungee heel strap.

POWER IN ANY WATER CONDITION

Power bars under the rails prevent overflex to maintain the optimum angle of attack under high load conditions.

OPEN HEEL DESIGN

ERGO 3 foot pocket profiled for premium comfort and power transfer.

MONPRENE® CONSTRUCTION

100% Monprene® eliminates broken blades, de-lamination and torn foot pockets—making it ideal for long-term, heavy-duty use.

EXTREMELY LIGHTWEIGHT

Lightweight design makes traveling more convenient and use in the water easier and more comfortable.

HIGH PERFORMANCE

The 25-degree pre-angled blade includes a central power panel, providing longitudinal rigidity and creating a channeling effect.

TRAVEL IN COMFORT AND STYLE

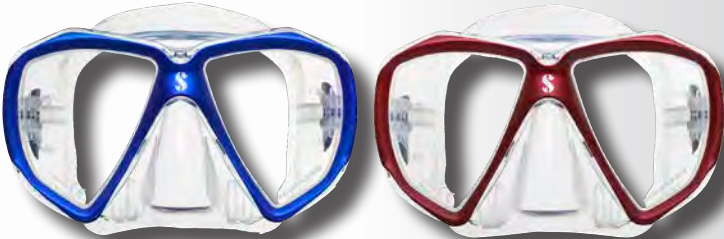

ESSENTIALS

SPECTRA

- Compact two windows design
- Crystal clear or black double sealed silicone skirt
- Swivel buckles for easy adjustment
- Tempered glass lenses
- Mirrored finish can be damaged if abrasive cleaning products are used

GO FINS

- Barefoot Design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff
- Ultra-strong 100 percent Monoprene® construction avoids problems of delamination, broken blades and torn foot pockets
- 25-degree pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channelling effect
- Power Bars on the underside of the rails prevent over flex to maintain the optimum angle of attack under high load conditions
- Fins fit easily in IATA carry-on compliant luggage for divers who like to travel fast and light
- Innovative Piggy Back Stack system interlocks one fin blade into the other, creating a snug pairing that makes packing and traveling that much easier.

NOVA 250

- 250 or 300 lumen illumination (rechargeable or disposable); 2700 lux @1m; 2700 lux @1m
- Push-button switch is easy to activate when wearing gloves
- Extended shroud prevents the light beam from blinding other divers
- Powered by a CR123 battery (rechargeable or disposable)
- Over-pressure valve releases battery off-gassing
- Double O-ring seals ensure watertight integrity
- Three modes: 100% power, 50% power and Flash
- CCT (correlated colour temperature): 4500°K
- Equipped with a Cree XPG LED
- [Includes CR123 Battery](#)
- Burn time: up to 1 hour
- A depth rating of 150m
- Measures 100mm x 26mm
- Weight (including batteries): 70g

Part No.	Description	Retail Inc GST
30.224.000	NOVALIGHT 250	115.00

FLASHY

- Mini LED flashlight comes with replaceable batteries (3 x CR1220)
- Key ring, plastic clip and cord.
- 12 hour burn time

Part No.	Description	Retail Inc GST
30.101.250	FLASHY, LED FLASH (20 pcs)	297.00

NOVA BATTERY AND CHARGER

- USB Charger and Cable
- Lithium Ion Battery for Nova 720/850 Series Torches

Part No.	Description	Retail Inc GST
835.980.016	TENERGY LI-ION BATTERY 3.7V	35.00
835.980.015	TENERGY BATTERY CHRGR	20.00

STANDARD WEIGHTBELT

Part No.	Description	Retail Inc GST
23.029.100	STD WEIGHT BELT BLACK	51.00
23.029.200	STD WEIGHT BELT BLUE	51.00
23.029.400	STD WEIGHT BELT LIME	51.00
23.428.001	BUCKLE, METAL	35.00

TK 15 TACTICAL KNIFE

- First top-of-the-line weapon of the new Tactical Knife Series
- High end professional/military knife
- 150mm blade with multiple tools including front end line cutter
- Saw teeth close to handle for better ergonomics
- Marine Grade Stainless Steel polished blade for endless lifespan
- Cool unique look and feel
- Traditional heavy duty style no frills
- Rugged technopolymer sheath with nylon straps included
- Branded hand cover with bungee included

Part No.	Description	Retail Inc GST
32.009.100	TK 15 KNIFE	278.00

MAKO

- Features a conventional edge, line cutting notch, serrated edge for rope cutting, bottle opener and a QR sheath with locking mechanism
- Titanium: extreme resistance to corrosion with durable edge
- Stainless Steel: excellent cutting edge & high resistance to rust

Part No.	Description	Retail Inc GST
32.023.000	Stainless	94.00
32.022.000	Titanium	169.00

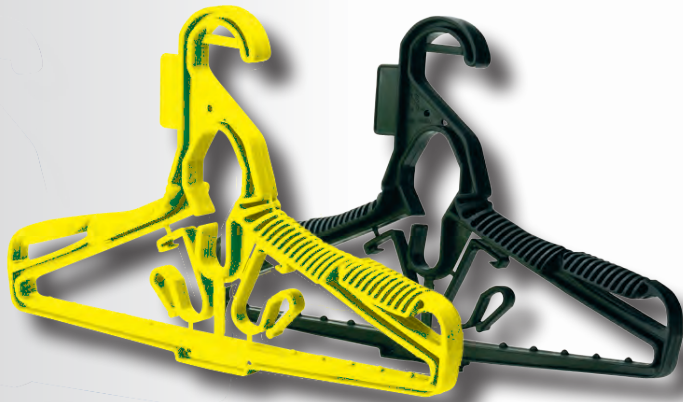

WHITE TIP BC KNIFE

- Features a conventional edge, line cutting notch, serrated edge for rope cutting and a QR sheath with locking mechanism
- Includes BC & Hose mount attachment Kit

Part No.	Description	Retail Inc GST
32.002.000	WHITE TIP KNIFE	94.00

UNIVERSAL HANGER

Part No.	Description	Retail Inc GST
51.056.000	MULTIHANGER GRAY	51.00
51.054.000	MULTIHANGER LIME	51.00

TANK HANDLE

Part No.	Description	Retail Inc GST
20.151.000	TANK HANDLE	44.00

SCUBAPRO CLEAR

- Scuba Clear - 30cc of Antifog solution, perfect for travelling.

Part No.	Description	Retail Inc GST
24.090.000	SCUBACLEAR 30CC	19.00

THE GALILEO HUD

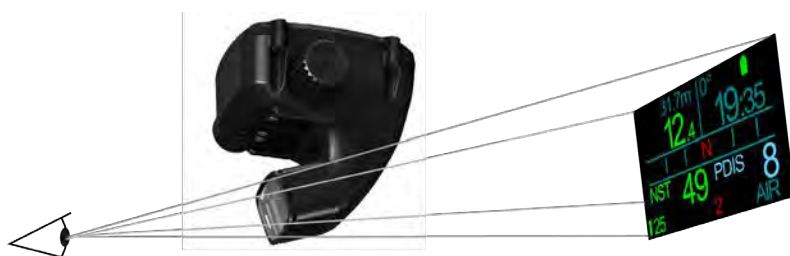

The new Galileo HUD is an innovative and thoroughly unique air-integrated dive computer. This new-to-the-dive-world, technologically-advanced computer offers a heads-up display mounted on a diving mask. Delivering excellent readability along with hands-free data monitoring, with the introduction of the Galileo HUD SCUBAPRO engineers have created a user experience unlike anything previously seen in diving.

“FLOATING” COLOR DISPLAY

The Galileo HUD’s micro OLED screen is designed to be mounted on a diving mask in close proximity to the human eye. Using precision near-eye optics, this “floating” display creates a screen image that appears at a virtual distance of approximately 1m, making it easy for divers to monitor their dive data without losing eye contact with their surroundings, or having to constantly refocus.

Dive information is displayed on the micro OLED screen protected in the housing, offering durability and superior readability in any ambient light conditions.

Unlike the Galileo HUD, conventional Combiner Glass HUD and Windshield HUD technologies available in automobiles, project data on a sheet of transparent material such as glass, making them inherently fragile and easily affected by certain light conditions.

SINGLE-KNOB USER CONTROL

The Galileo HUD features an intuitive push-wheel that allows you to access and control HUD functions with one hand. To operate the push-wheel, simply rotate it to navigate up and down within a menu, or increase or decrease a user setting. Throughout the process screen prompts indicate which type of press is required to accomplish each function.

FLIP-UP HINGE

Before or after a dive, or any time you don’t need ready-access to your dive data, the Galileo HUD offers a convenient Flip-Up feature, reminiscence of military night vision goggles, that enables you to tilt the HUD display up and out of the way.

COMPATABILITY

Galileo HUD is compatible with a variety of SCUBAPRO masks, including the Spectra, Spectra Mini, Zoom EVO (special mask holder), and Synergy Twin
