*Explore & Dive The Palau Islands*

# PALAU-MICRONESIA

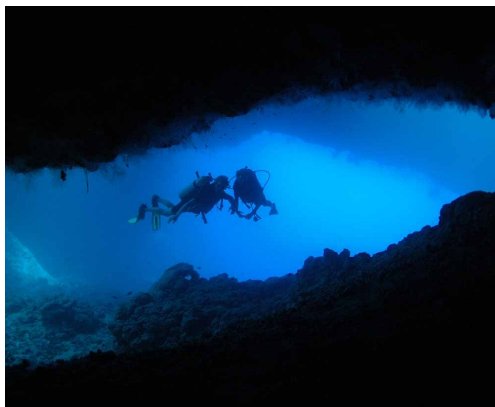

## Special Group Departure

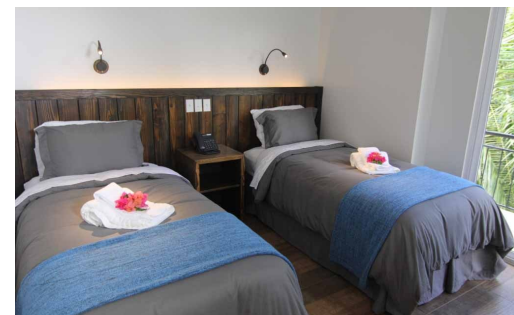

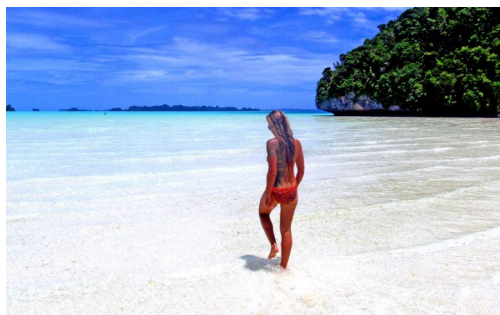

Palau is world-renowned for its marine biodiversity and an abundance of large pelagic animals. The area offers avid wreck divers one of Micronesia's most extensive collections of WWII shipwrecks. From current swept plateaus to sheltered coral gardens, you will find an incredible range of diving for every level of interest and skill. The majority of diving is drift diving along the walls, plateaus and coral gardens of the outer reef, with the dive boat following along from the surface to meet you upon ascent.

Experience the sites that make Palau one of the top dive destinations in the world: the sharks of Blue Comer, the manta rays of Devilfish City and German Channel, and the coral reefs and stunning drop-offs teeming with marine life. Ulong Channel and the Rock Islands and Ngerchu - for some speedy drift dives. Many of the channels have strong currents and reef hooks are an essential piece of diving equipment, however diving here is suitable for all levels of experience.

Koror is the biggest urban dwelling in Palau and is a great place to base yourself when visiting this beautiful country. It is the country's economic and commercial hub and is within close proximity to some of Palau's most spectacular and interesting sights. Take a trip to the famous Jellyfish Lake, learn about local heritage and culture at a local museum or bai, visit an ancient monolith, or visit one of the WWII relics left behind.
